

AnTek AS-4T400 has 2 primary windings. Wire them in parallel for a 120VAC @ 60Hz mains supply. Note the primary is nominal 115V / 230V, but all simulations have been performed assuming 120V mains voltage.

AnTek AS-4T400 has 2 400V @ 500mA secondary windings. Wire them in parallel for the HV supply.
